SAGE ACCPAC

Sage Accpac Integrated Suite

Get a 360° view of your business with Sage Accpac

sage

Whether your growth plans include buying and selling in the global marketplace, adding more talent to your team, or expanding your services, Sage Accpac ERP, part of the Sage Accpac Integrated Suite, has the tools and the flexibility to successfully accelerate your business expansion. Supporting different languages and multicurrency transactions, our network of partners in more than 150 countries allows you to confidently conduct business with suppliers and customers anywhere in the world.
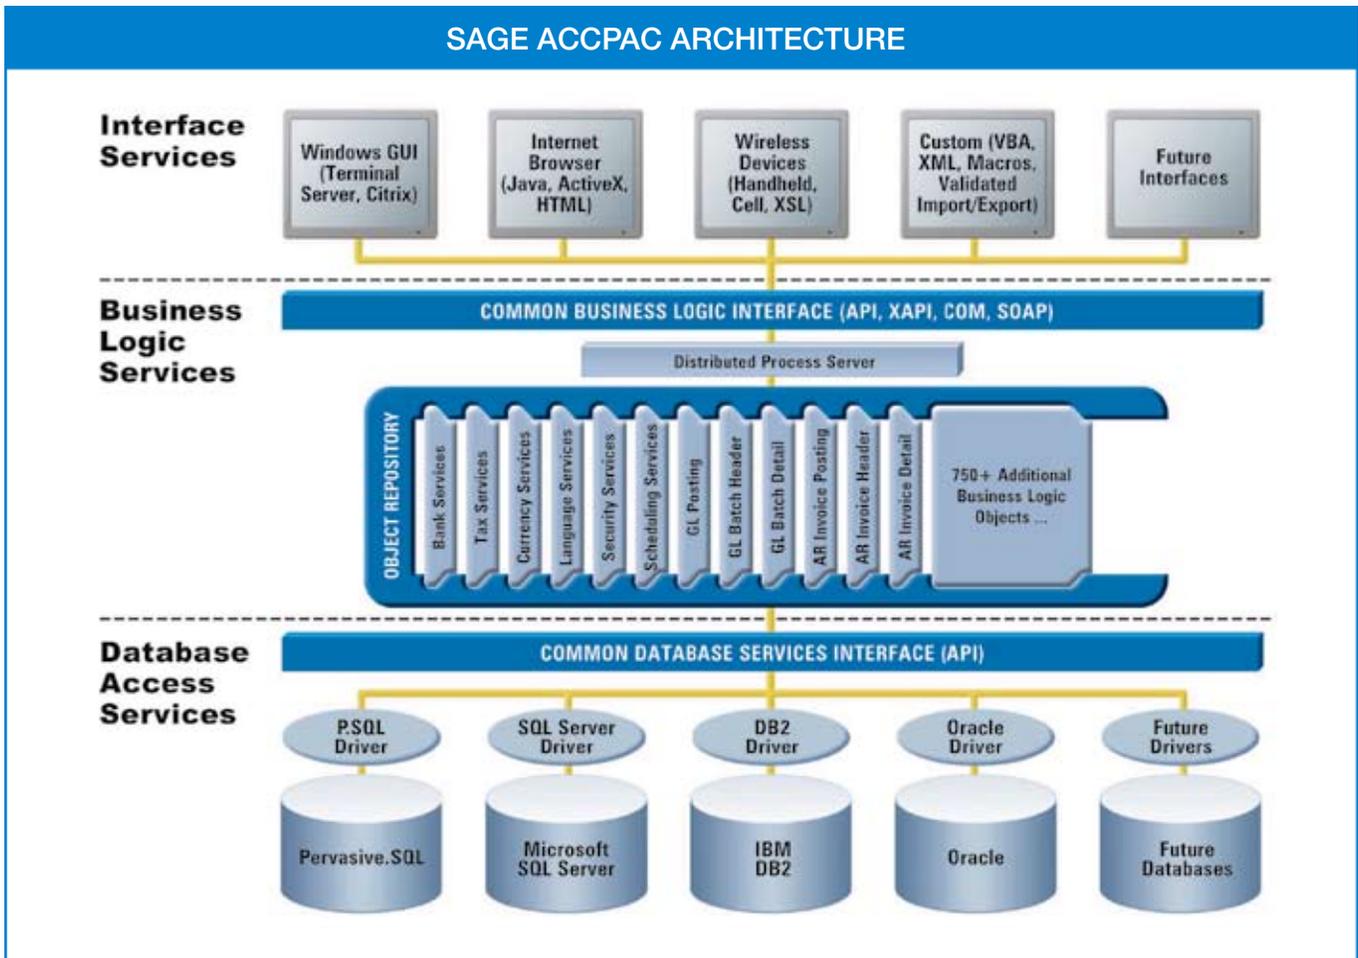

World-Class Architecture

Sage Accpac ERP is an advanced application built on a multi-tiered, object-oriented architecture. Designed for the SME market, Sage Accpac can be deployed either as a Web-based application or as a desktop application.

Sage Accpac lets you choose the solutions and configurations that work best for you: The applications, the database, the deployment options and languages, the network environment or operating system, and the add-on software developed by Sage Software or one of our network of independent industry experts. We're here to help you operate more efficiently and allow you to focus on growing your business the right way.

Ultimate Scalability

From single-user remote locations to large corporate environments with multiple locations and demanding business management needs, no other product scales like Sage Accpac ERP. With Sage Accpac, you can upgrade smoothly from one version to the next as your business requirements expand, safe in the knowledge that your data will easily move with you.
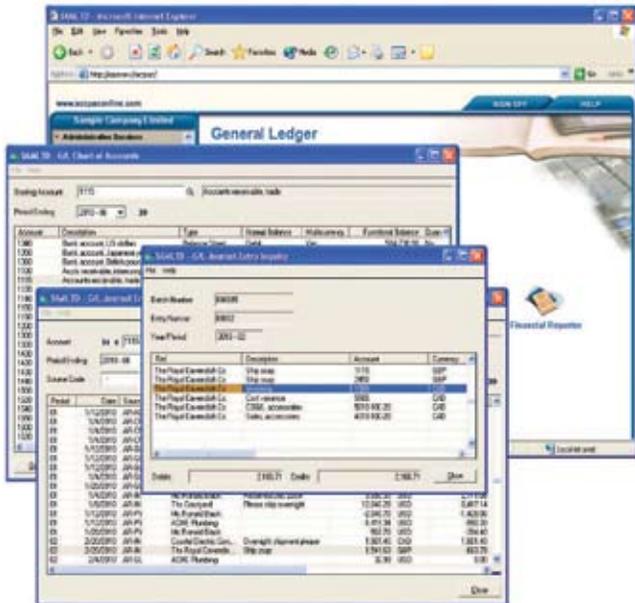

All Sage Accpac products have a uniform user interface, making it easy to upgrade without costly staff retraining or data conversion. Sage Accpac also enables data processing across multiple servers, so as your number of users increases, multiple servers can share the processing workload.

Easy to Use and Customize

Sage Accpac ERP is easy to set up and use, with intuitive wizards and a familiar interface that make configuration and navigation a breeze. Embedded Microsoft Visual Basic for Applications (VBA) lets you easily expand, customize, and integrate your Sage Accpac application.

*Cross-module capabilities let you drill down to the original transaction.*

Total Investment Protection

Sage Accpac ERP is a complete system designed to give your business the competitive advantage. Our value-added protection plan, offered across all product lines, gives you the investment protection you need to move quickly and easily from one version to the next, so you can increase the functionality of your system as your business requirements expand.

India TDS Module

Sage Accpac ERP is a global solution designed to suit the local Indian business needs. The solution addresses and complies with Indian statutory requirements and comes with the TDS module. Key features Include:

- Statutory Form Reporting (16A, 26Q, 27Q)
- E-Filing
- TDS Posting
- Remittance creation & entry
- Prepayment entry

Designed for Global Business

In today's global marketplace, your suppliers, your customers, and your competition are no longer limited by physical borders. That's why you'll be glad to know that Sage Accpac is deployed in more than 150 countries worldwide and supports multiple languages, so it can satisfy even the most demanding international requirements. A truly global application, Sage Accpac handles transactions using multiple currencies, calculates currency-revaluation, and complies with local accounting.

Industry-Specific Solutions for Your Business

Your Sage Accpac ERP system is supported by a network of local experts who can enhance and extend it further to meet your market's specific requirements, thanks to the wide range of high-quality integrated vertical tools and our strong network of more than 400 development partners. Whatever your industry, our skilled partner network makes it possible to meet any business challenge, no matter how unique.

> "Sage Accpac takes a sovereign position in mid-market solutions for the breadth of its integration. Architected for the Web, the object-oriented technological infrastructure has served the company well in supporting a total back-office to front-office integration of the complete product line."

Freedom of Choice

With streamlined integration across applications, advanced Web and wireless access, full multilingual and multicurrency capabilities, a scalable open architecture, and a choice of databases and operating systems, you can select the edition that best meets your business needs now, and you can be sure it will comfortably grow with your business in the future.
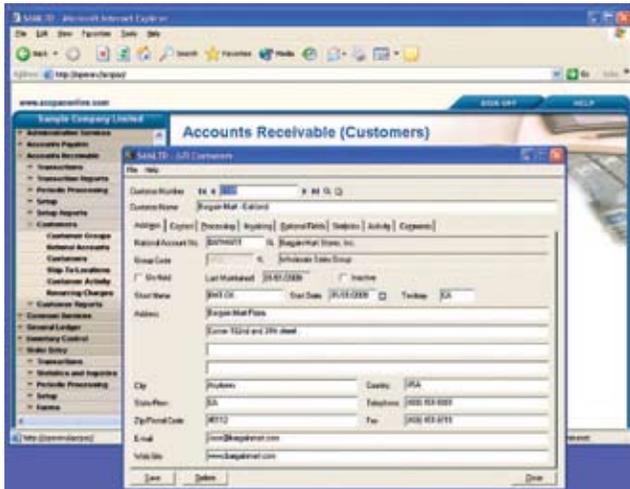

Sage Accpac Integrated Suite

The Sage Accpac Integrated Suite offers the freedom of choice, ease of integration, high performance, and reliability that forward-thinking companies rely on to increase profitability and seize the competitive advantage. At the core of the Sage Accpac Integrated Suite are strong financial and operational capabilities .

Core Financial

The financial modules of Sage Accpac ERP – accounts receivable, accounts payable, the general ledger, and the system manager – are powerful tools to help you confidently manage your business' complex finances. Available with full multicurrency capability, powerful bank reconciliation and tax reporting features, flexible transaction processing options, and informative dashboards for analytical reporting, Sage Accpac Core Financials help businesses succeed by accurately presenting valuable financial information in a clear, understandable format.
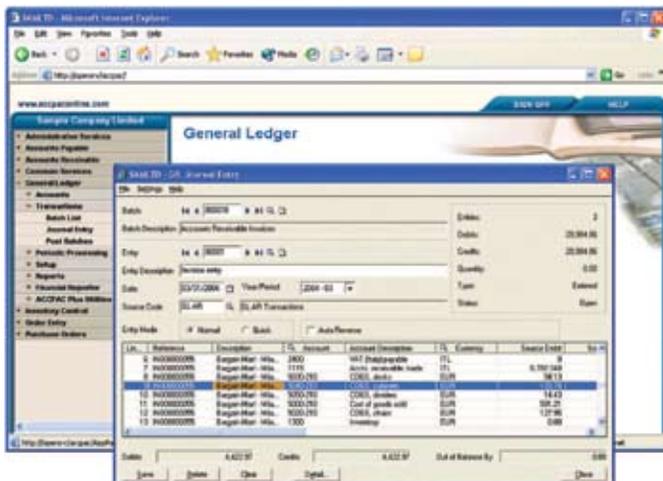

To grow, you need to compete. To compete, you need to be intelligent. Sage Accpac provides you with tools that allow you to spend less time on the small details and more time on the big picture that will net you valuable business intelligence to make your organization more competitive.

Take advantage of powerful AR features to make the most of your customer and contact information.

Core Operational

The core operational modules of Sage Accpac ERP (inventory control, order entry, purchase orders, and project and job costing) streamline the order fulfillment process so your business delivers every time. The order entry and purchase orders modules are fully integrated with project and job costing, offering the most flexibility in the way transactions can be processed, while the inventory control module allows you to manage thousands of items and create flexible price lists. You even have the option of determining how and when inventory costing is performed, offering you ultimate freedom in managing your business your way.

Sage Accpac delivers sophisticated multicurrency and global accounting features.

Database and Operating Systems Support

Sage Accpac ERP can be deployed on either Microsoft® Windows or Linux operating systems and can run on a variety of back-end database structures, including:

• Microsoft SQL® Server

• Pervasive.SQL

• IBM DB2

• Oracle

Accounts Payable, receivable and Sales Analysis dashboards

Editions

Sage Accpac ERP 100

Our entry level offering for a growing business that requires strong and secure financial and operations management. Sage Accpac ERP 100 handles up to three GL account segments, stores up to seven years of history and can accommodate up to ten concurrent users. And, Sage Accpac 100 easily manages data for up to five different companies.

Sage Accpac ERP 200

This edition builds on the solid financial and operations management capabilities of Sage Accpac ERP 100, but we've added advance credit claim and user-defined account group capabilities, and support for up to four GL segments. Sage Accpac ERP 200 can accommodate up to twenty concurrent users and there is no restriction on the number of companies that can be managed.

Sage Accpac ERP 500

This edition provides the mid-market customer with big business aspirations all the tools for success. Sage Accpac ERP 500 offers advanced inventory, purchasing, and order management with up to 10 GL account segments, unlimited account structures, 99 years of financial history, and the ability to manage an unlimited number of concurrent users and companies.

With Sage Accpac business analysis tools, we are more confident than ever in our ability to make the best possible decisions for our company. With such a seamless conversion of our data and significant gains in productivity and efficiency, it is clear that Sage Accpac was the right choice for NAA."
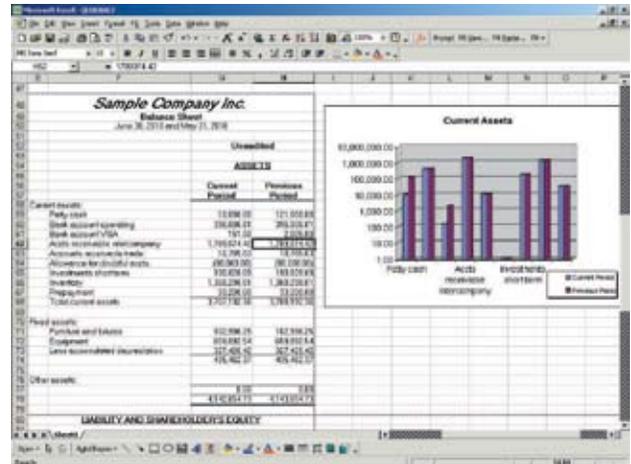

Steve Harfst, COO North American Airlines

Customer Relationship Management

Sage CRM is a powerful, easy to use customer relationship management solution that integrates directly with Sage Accpac ERP right out of the box.

With Sage CRM, you can automate your business processes to synchronize sales, marketing, and customer care activities across your organization, giving you complete business and customer perspectives, anytime, anywhere. And since it integrates with other business applications through an intuitive Web services interface, you can enhance your productivity even further.

Regardless of how, when, or where your customers, partners, and prospects choose to interact with your company, Sage CRM for Sage Accpac delivers comprehensive, easy-to-use tools to help you confidently manage these relationships.

With growth comes complexity. Sage Accpac allows you to automate processes with our integrated modules that can be added as needed to help you keep up with the demands of your business.

With Sage Accpac Insight, powerful and flexible financial reporting is fully integrated with Microsoft Excel.
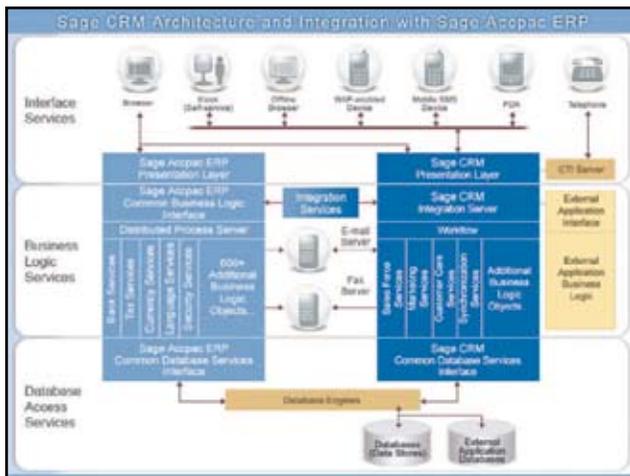

Business Intelligence: Sage Accpac Insight

Sage Accpac Insight is an enterprise-wide reporting, budgeting, and consolidations application that is ideal for employees in remote offices and disparate departments who need to manage, distribute, and collaborate information from a single source. It allows users to quickly capture and process information into meaningful reports and to securely distribute them across the entire enterprise on demand.

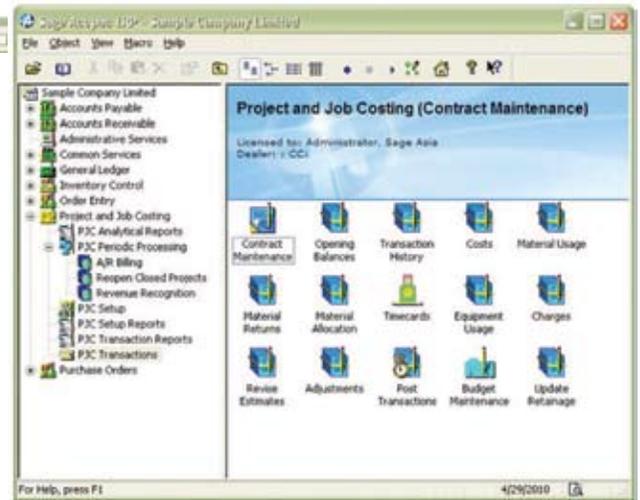

Run Your Business Your Way

Sage Accpac ERP offers out-of-the-box integration with a wide range of end-to-end business management applications. These reliable, cost - effective solutions — from Web store to warehouse management — can be implemented all at once or one at a time, depending on your particular business needs.

Sage Accpac Project Job Costing

The Project Job Costing module provides an effective solution for project managers in construction, job service, and other professional industries who require a time-and-material system. It delivers the tools necessary to manage the simplest to most complex contract or job. It makes the estimating, tracking, costing, and billing of projects easy and manageable - simplifying cost control and planning Sage Accpac Project Job Costing connects project activities with company financials, provides extensive inquiry and reporting capabilities and helps ensure accurate and timely accounting and billing processes throughout the life of a project.

With the powerful features you get in Project and Job Costing, you can identify potential issues and determine success factors for any project. The automated billing features in this job cost accounting software streamline customer invoicing and reduce the time spend managing this process.

If you are a project manager or an accountant in the construction/ engineering, services, manufacturing, telecommunications, transport or any business where you provide a service or a product over a given period of time and you need to track cost carefully to ensure profitability then Sage Accpac Project and Job Costing is the tool you should have.

Sage Accpac Project Job Costing Capabilities

- Select the accounting method (revenue recognition method) for each project within the contract. Choose from total cost percentage complete, category cost percentage complete, labor hours percentage complete, billings and costs, project percentage complete, completed project, or accrual-basis.

- Close a project to billings and /or costs at any time.

- Drill down to the originating transactions.

- Assign staff, material, subcontractors, equipment, miscellaneous items, and overhead to each project within the contract with this powerful job cost accounting software.

- Set up complex estimates by specifying the quantity (e.g., hours), unit cost, and billing rate (for time-and-materials projects) for each staff member, material (inventory item), subcontractor, equipment, miscellaneous item, and overhead expense allocated to the project. Assign cost categories and automatically calculate cost and revenue estimates per cost category or simply define the cost and revenue estimates for each project category .

- And many more...

Project and Job Costing
